POLIOXOMETALATES-CATALYTIC AND BIOLOGIC ACTIVE SUBSTANCES

CERES Project 2-33/ 2002

Project director: dr Cristina Ratiu

RESULTS

- •Procedure/technologY for the synthesis of some polioxometalates with catalytic potential for oxidation processes
- •Studies reffering to the polyoxometalates biological activity
- •Polyoxometalates with Keggin and Wells-Dawson structure utilizable as ecological catalystS in manufacture of aromatizing substances.
- Papers
